Multicultural Education Abstracts is a current awareness service which draws on a wide range of international sources in order to serve the information needs of those throughout the world, concerned with multicultural education. The coverage of the service is broad in order to include the many diverse types of material that are relevant to study in this area.

With the aid of an author and subject index in each issue, readers are able to quickly identify publications of particular interest to them. All the major international journals are scanned, and other original sources and cataloguing services regularly searched, for appropriate items. This service gives particular emphasis to material of value which is not always easily accessible, such as conference papers, reports, and important theses. Special arrangements have been made with *CORE (Collected Original Resources in Education)*, the microfiche journal first published in 1977, to provide in most cases an immediately available microfiche version of abstracted items not readily available in conventional form. Abstracts are non-evaluative in form, and are accompanied by detailed bibliographical citations. An annual cumulative author and subject index is bound in the final issue of each volume. *Multicultural Education Abstracts* is available online as part of the Educational Research Abstracts database <http://www.tandf.co.uk/era>

Cumulative Subject index

Volume 21, 2002

(Numbers refer to abstracts and not to pages)

This is a modified keyword index. Abstracts are indexed under significant terms taken from either the title or from the abstract itself. These may be single words (e.g. race) or phrases (e.g. academic achievement). Proper names are also indexed (e.g. Wechsler Intelligence Scale for Children—WISC). Correct use of the index requires that you be mindful of synonyms and related terms (e.g. multicultural education, intercultural education), of variant forms of the same word (e.g. delinquent, delinquency), and of variant spellings (e.g. behavior, behaviour).
